ARLIGHT creates difference with its accredited lighting laboratory

It is the one of the foremost laboratories in Turkey where important experiments are carried out. Tests and measurements we are performing:

- ✓ Goniophotometric
- ✓ Photometric and Spectroradiometric
- ✓ Electrical Safety
- ✓ Electromagnetic Compability
- ✓ IP & IK
- ✓ Mechanical Resistance
- ✓ Thermal
- ✓ Function & Performance

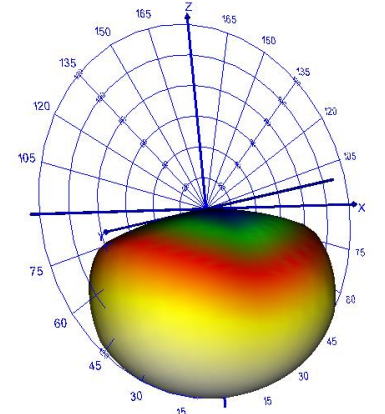

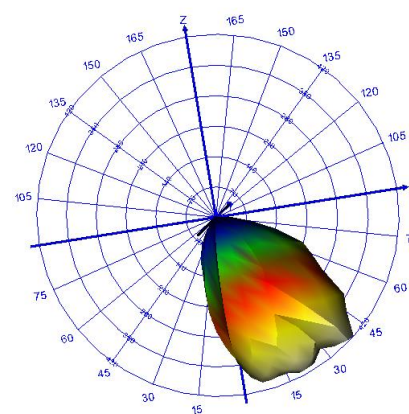

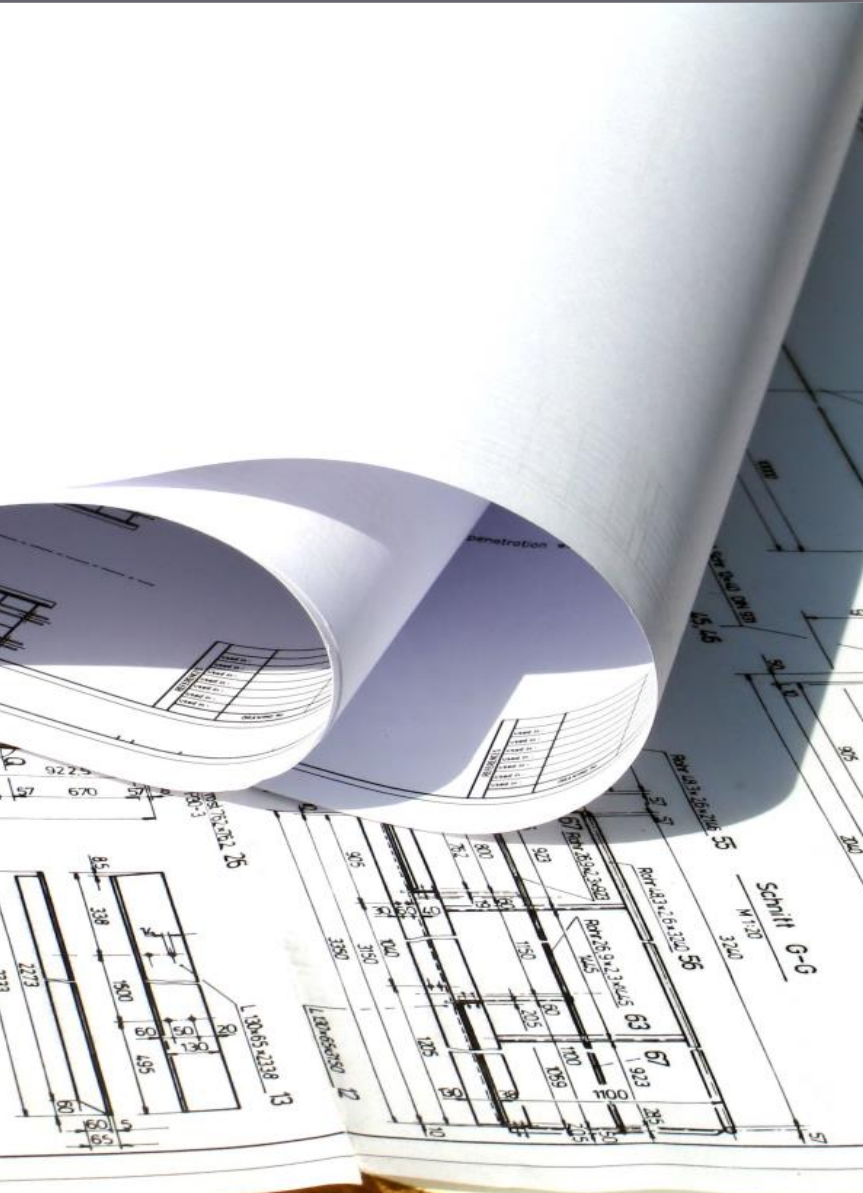

Premium Partner

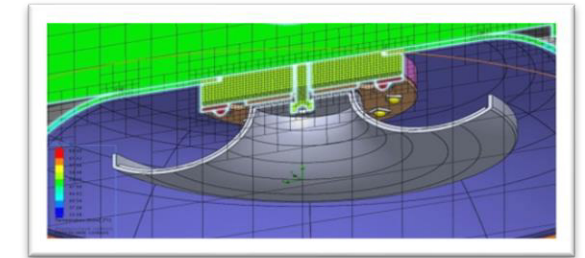

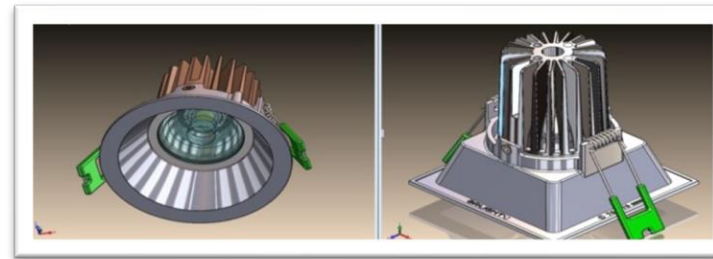

- We believe that light, applied in the right place in the right amount, can bring a positive impact on human life
- From a full concept proposal, we deliver innovative energy efficient solutions which helps to simplify daily routines.
- Lighting calculations, project service are provided by Auto Cad drawings
- DIALux, DIALux Evo,

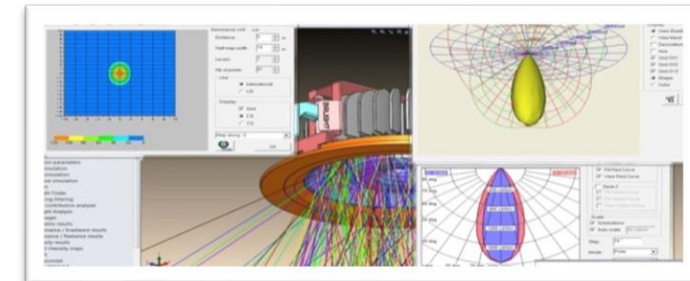

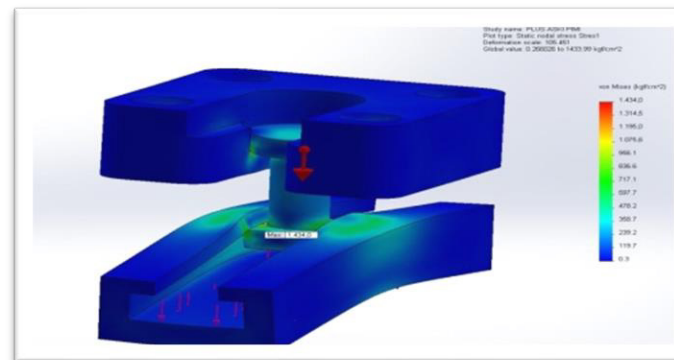

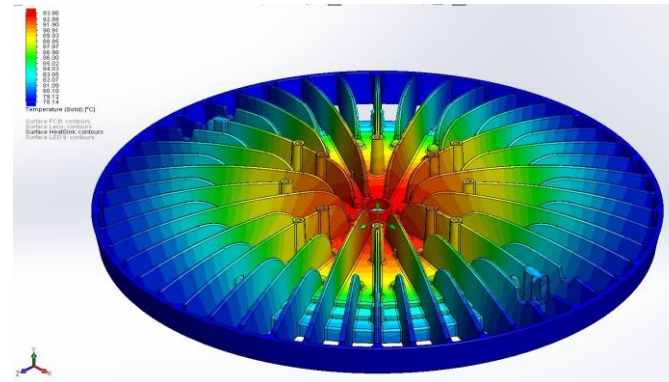

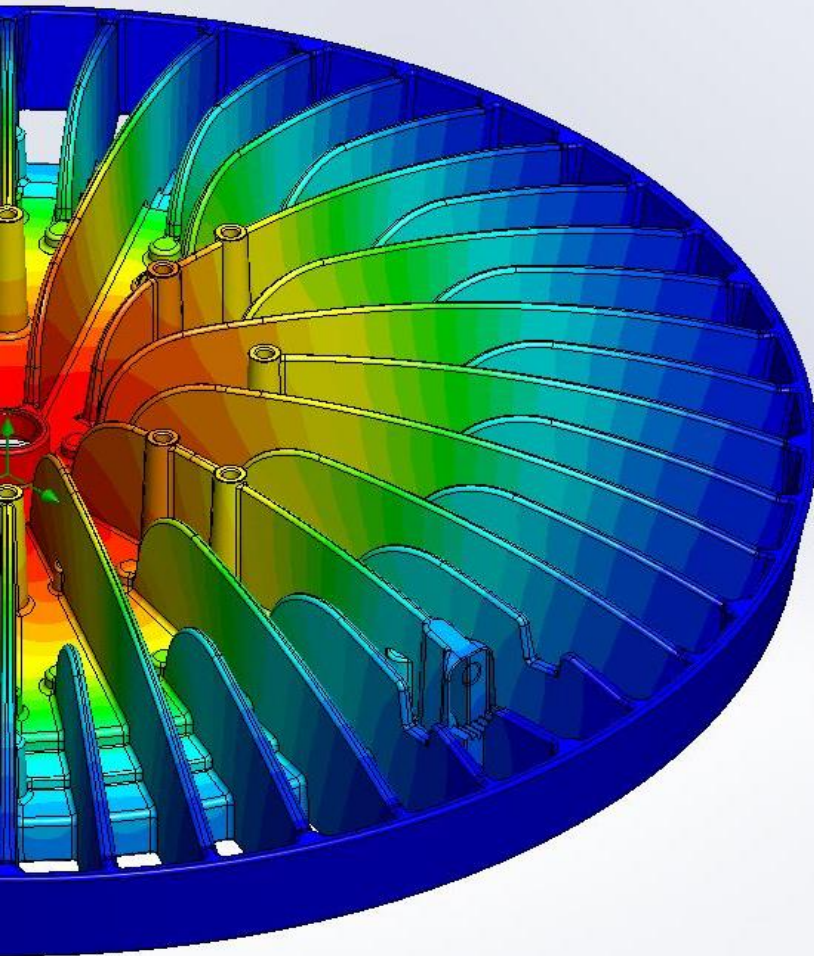

Luminaire designs are made by **Solidworks** 3D CAD software in mechanical design department. All of the products ,which we have designed in-house, and our own structure are patented.

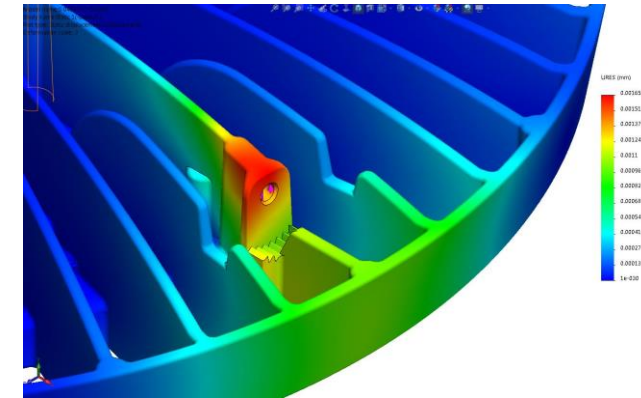

Optical analyses are conducted at the design stage, using OptisWorks software at first. Thermal analyses are done by using Solidworks Flow Simulation.

Installation instructions prepared by the Technical Department then proceeded to the production phase.

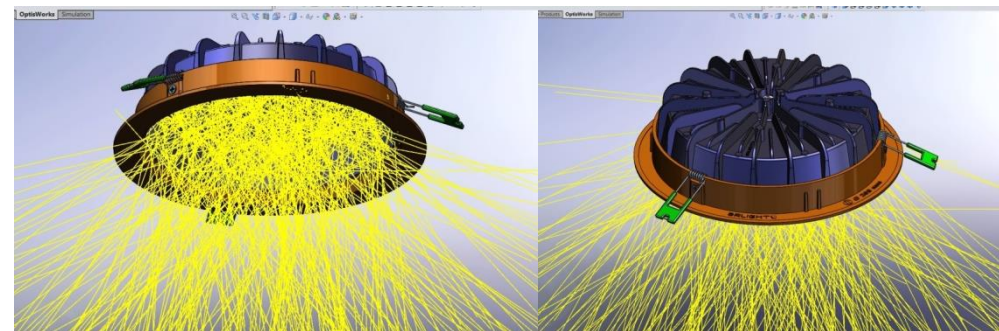

Thermal Design & Modelling

Mechanical Design & Modelling

Optical Design & Modelling

- **Shipping Services**

Providing delivery services with global solution partners.
(UPS, TNT, DHL, MSC, MAERSK etc)

MAERSK

- **Warranty;**

We offer **5** years warranty for all of our products except lighting bulbs.
